Lighthouse Report

Lighthouse is an open-source, automated tool for improving the quality of web pages. You can run it against any web page, public or requiring authentication. Overall scoring color key: (0-49 50-89 90-100).

For scripted tests, Lighthouse report will only be available on the final step.

Did you know? Lighthouse runs in Chrome and provides a great complementary analysis alongside the many browsers, devices, and locations WebPageTest offers. To see how this site performs in more environments: [Start A New Test](#)

Opportunities (13)

- ▶ **Enable text compression** Estimated savings 456.34 s
- ▶ **Reduce unused JavaScript** Estimated savings 263.71 s
- ▶ **Serve images in next-gen formats** Estimated savings 136.88 s
- ▶ **Use HTTP/2** Estimated savings 85.43 s
- ▶ **Properly size images** Estimated savings 75.1 s
- ▶ **Reduce unused CSS** Estimated savings 64.94 s
- ▶ **Defer offscreen images** Experiment Available! (Run a full test to view) Estimated savings 5 s

- ! **Minify CSS** Estimated savings 1.67 s
- ! **Eliminate render-blocking resources** Experiment Available! (Run a full test to view) Estimated savings 0.83 s
- ! **Avoid serving legacy JavaScript to modern browsers** Estimated savings 0.33 s
- ! **Preconnect to required origins** Estimated savings 0.3 s
- i **Initial server response time was short** Estimated savings 0.28 s
- ! **Preload Largest Contentful Paint image** Experiment Available! (Run a full test to view)

Diagnostics (13)

- ! **Largest Contentful Paint element** 45,660 ms
- ! **Reduce the impact of third-party code** Experiment Available! (Run a full test to view) Third-party code blocked the main thread for 2,010 ms
- ! **Reduce JavaScript execution time** 9.3 s
- ! **Minimize main-thread work** 23.0 s
- ! **Avoid large layout shifts** Experiment Available! (Run a full test to view) 11 elements found
- i **Avoid chaining critical requests** 1 chain found
- ! **Ensure text remains visible during webfont load** Experiment Available! (Run a full test to view)
- ! **Avoid enormous network payloads** Experiment Available! (Run a full test to view) Total size was 3,628 kB
- i **Avoid long main-thread tasks** 20 long tasks found
- ! **Avoid an excessive DOM size** 1,011 elements
- i **Avoid non-composited animations** 27 animated elements found
- ! **Image elements do not have explicit width and height** Experiment Available! (Run a full test to view)
- ! **Serve static assets with an efficient cache policy** 61 resources found

Passed Audits (13)

- ✓ **Avoid multiple page redirects**
- ● **Preload key requests**
- ✓ **Minify JavaScript**
- ✓ **Use video formats for animated content**
- ● **Largest Contentful Paint image was not lazily loaded**
- ● **Lazy load third-party resources with facades**
- ✓ **Remove duplicate modules in JavaScript bundles**
- ✓ **Has a `<meta name="viewport">` tag with width or initial-scale**
- ✓ **Efficiently encode images**
- ● **User Timing marks and measures**
- ✓ **Uses passive listeners to improve scrolling performance**
- ✓ **Avoids `document.write()`**
- ✓ **Page didn't prevent back/forward cache restoration**

Best practices (1)

- ! [user-scalable="no"] is used in the <meta name="viewport"> element or the [maximum-scale] attribute is less than 5.

Contrast (1)

- ! Background and foreground colors do not have a sufficient contrast ratio.

Names and labels (3)

- ! Image elements do not have [alt] attributes
- ! Image elements have [alt] attributes that are redundant text.
- ! Links do not have a discernible name

Navigation (1)

- ! Heading elements are not in a sequentially-descending order

ARIA (2)

- ! [aria-hidden="true"] elements contain focusable descendants
- ! Elements with an ARIA [role] that require children to contain a specific [role] are missing some or all of those required children.

Tables and lists (2)

- ! Lists do not contain only elements and script supporting elements (<script> and <template>).
- ! List items () are not contained within , or <menu> parent elements.

Additional Items to Check Manually (10)

- ● Interactive controls are keyboard focusable
- ● Interactive elements indicate their purpose and state
- ● The page has a logical tab order
- ● Visual order on the page follows DOM order
- ● User focus is not accidentally trapped in a region
- ● The user's focus is directed to new content added to the page
- ● HTML5 landmark elements are used to improve navigation
- ● Offscreen content is hidden from assistive technology
- ● Custom controls have associated labels
- ● Custom controls have ARIA roles

Passed Audits (13)

- ✓ [aria-*] attributes match their roles
- ✓ Values assigned to role="" are valid ARIA roles.
- ✓ [aria-hidden="true"] is not present on the document <body>
- ✓ [role]s have all required [aria-*] attributes
- ✓ [role] values are valid
- ✓ [aria-*] attributes have valid values
- ✓ [aria-*] attributes are valid and not misspelled

- ▶ Buttons have an accessible name
- ▶ Document has a `<title>` element
- ▶ `[id]` attributes on active, focusable elements are unique
- ▶ `<html>` element has a `[lang]` attribute
- ▶ `<html>` element has a valid value for its `[lang]` attribute
- ▶ No element has a `[tabindex]` value greater than 0

Not Applicable (31)

- ▶ `[accesskey]` values are unique
- ▶ button, link, and menuitem elements have accessible names
- ▶ Elements with `role="dialog"` or `role="alertdialog"` have accessible names.
- ▶ ARIA input fields have accessible names
- ▶ ARIA meter elements have accessible names
- ▶ ARIA progressbar elements have accessible names
- ▶ `[role]`s are contained by their required parent element
- ▶ Elements with the `role=text` attribute do not have focusable descendants.
- ▶ ARIA toggle fields have accessible names
- ▶ ARIA tooltip elements have accessible names
- ▶ ARIA treeitem elements have accessible names
- ▶ The page contains a heading, skip link, or landmark region
- ▶ `<dl>`'s contain only properly-ordered `<dt>` and `<dd>` groups, `<script>`, `<template>` or `<div>` elements.
- ▶ Definition list items are wrapped in `<dl>` elements
- ▶ ARIA IDs are unique
- ▶ No form fields have multiple labels
- ▶ `<frame>` or `<iframe>` elements have a title
- ▶ `<html>` element has an `[xml:lang]` attribute with the same base language as the `[lang]` attribute.
- ▶ Input buttons have discernible text.
- ▶ `<input type="image">` elements have `[alt]` text
- ▶ Form elements have associated labels
- ▶ Links are distinguishable without relying on color.
- ▶ The document does not use `<meta http-equiv="refresh">`
- ▶ `<object>` elements have alternate text
- ▶ Select elements have associated label elements.
- ▶ Skip links are focusable.
- ▶ Tables have different content in the summary attribute and `<caption>`.
- ▶ Cells in a `<table>` element that use the `[headers]` attribute refer to table cells within the same table.
- ▶ `<th>` elements and elements with `[role="columnheader"]`/`"rowheader"` have data cells they describe.

- ▶ ● [lang] attributes have a valid value
- ▶ ● <video> elements contain a <track> element with [kind="captions"]

Best Practices

70

Trust and Safety (1)

- ▶ ● Ensure CSP is effective against XSS attacks

User Experience (1)

- ▶ !● Serves images with low resolution

General (5)

- ▶ ● Detected JavaScript libraries
- ▶ !● Uses third-party cookies 1 cookie found
- ▶ !● Browser errors were logged to the console
- ▶ !● Missing source maps for large first-party JavaScript
- ▶ !● Issues were logged in the Issues panel in Chrome Devtools

Passed Audits (9)

- ▶ ✓● Uses HTTPS
- ▶ ✓● Avoids requesting the geolocation permission on page load
- ▶ ✓● Avoids requesting the notification permission on page load
- ▶ ✓● Allows users to paste into input fields
- ▶ ✓● Displays images with correct aspect ratio
- ▶ ✓● Page has the HTML doctype
- ▶ ✓● Properly defines charset
- ▶ ✓● Avoids unload event listeners
- ▶ ✓● Avoids deprecated APIs

Not Applicable (1)

- ▶ ● Fonts with font-display: optional are preloaded

SEO

77

Content Best Practices (2)

- ▶ !● Links do not have descriptive text 2 links found
- ▶ !● Image elements do not have [alt] attributes

Crawling and Indexing (1)

- ▶ !● Links are not crawlable

Additional Items to Check Manually (1)

- ▶ ● Structured data is valid

Passed Audits (10)

- ▶ ✓ Has a `<meta name="viewport">` tag with width or initial-scale
- ▶ ✓ Document has a `<title>` element
- ▶ ✓ Document has a meta description
- ▶ ✓ Page has successful HTTP status code
- ▶ ✓ Page isn't blocked from indexing
- ▶ ✓ robots.txt is valid
- ▶ ✓ Document has a valid hreflang
- ▶ ✓ Document uses legible font sizes 99.7% legible text
- ▶ ✓ Document avoids plugins
- ▶ ✓ Tap targets are sized appropriately 100% appropriately sized tap targets

Not Applicable (1)

- ▶ ● Document has a valid rel=canonical

PWA

63

Installable (1)

- ▶ ! Web app manifest or service worker do not meet the installability requirements

1 reason

PWA Optimized (5)

- ▶ ✓ Configured for a custom splash screen
- ▶ ✓ Sets a theme color for the address bar.
- ▶ ✓ Content is sized correctly for the viewport
- ▶ ✓ Has a `<meta name="viewport">` tag with width or initial-scale
- ▶ ! Manifest doesn't have a maskable icon

Additional Items to Check Manually (3)

- ▶ ● Site works cross-browser
- ▶ ● Page transitions don't feel like they block on the network
- ▶ ● Each page has a URL
